D.A. ACCESS

CAD
INTEGRATION

Because LensLock offers a TRUE unlimited data plan, evidence can be stored as long as you need it, or longer. Every time a video or still image file is accessed, it is logged for chain of custody.

Files can be shared internally or with the D.A. office, with options that tag the specific spot to be reviewed or in view mode only, prohibiting any edits or other changes.

Visit www.lenslock.com or call us today
